

CANINSULIN VETPEN | rewriting pet diabetes management

Pen shaped for increased pet-owner **ACCEPTANCE**

Less threatening appearance may ease client anxiety or resistance to starting treatment

STURDY cartridge holder reduces the chance of breakage

Ergonomically designed dose trigger for **EASE** of handling for all user capabilities

Double needle caps and needle remover for added **SAFETY**

29G 1/2" advanced needle for greater injection **COMFORT**

- Triple sharpened with anti-coring treatment reduces penetration force
- World's most advanced silicone for lowest glide force
- Thin wall technology for improved drug flow
- Anti-coring treatment at the rear of the needle for clean piercing of the insulin cartridge, with no fragmentation

2.7ml (108 units) cartridge size helps to **ELIMINATE WASTAGE**

Cartridges contain mixing beads to ensure **CONSISTENT** dosing

Caninsulin is the world's leading veterinary insulin for cats and dogs, offering **CONFIDENCE** and **FAMILIARITY** for diabetic case stabilisation

Simple dose dial for **FAST, EASY** and **CONSISTENT** dosing

- Dramatically reduces dose preparation time
- Dosing accuracy is less reliant on client's vision or dexterity

Two pen sizes (0.5-8 IU and 1-16 IU) for **FLEXIBLE** management of different pet sizes

Precision instrumentation for dosing **ACCURACY** down to 0.5 unit increments*, with significantly reduced occurrence of air bubbles

Proven more consistent and accurate than syringes** - may improve diabetic stability of pets on smaller doses

All-in-one construction for greater **CONVENIENCE** and **PORTABILITY**, allowing timely dosing, wherever that may be

Less impact on owner lifestyle

What your colleagues are saying about Caninsulin VetPen:

“FINALLY, I CAN OFFER my clients some **GOOD NEWS** after telling them their pet has diabetes.”

“IT’S A PLUS for my clients who don’t like using syringes.”

“This could **REALLY BENEFIT** my clients, especially those who have poor eyesight or have unsteady hands.”
